29½" MagicArch™

2.79 ea - Order 5 per style

MagicArch™ modules make arch assembly easy and fast. Even a beginner can design striking balloon décor that assembles in a fraction of the time required by traditional latex or foil arches and columns.

MagicArch™ is a unique cloverleaf shaped balloon that appears to be four separate, round, foil balloons. There is only one inflation valve per module. Each of the four segments inflates to an exact, uniform size. Just fill the balloons, string them together with archline, and display a perfect arch.

The assembled arch pictured uses: 15 blue, 16 red, and 8 silver. Modify the color selection for the appropriate season or special occasion.
