#1537

Assemble the Balloon Display Tower. Fill the base with water to provide stability. Extend the pole four feet.

#91207 - Primary Balloon

Air inflate the foil balloon. Slide the tail through one of the holes in the balloon cup. Secure it with clear tape. Slip an uninflated 260 through the two remaining holes in the cup. Set aside.

Latex Double Collar

Air inflate two 5" latex balloons. Tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Create a second cluster using 11" latex inflated to 7". Twist the two clusters together to form the double collar. Slip the collar onto the pole. Attach the foil balloon to the top of the tower and nest the double collar snugly under it. Slip the uninflated 260 through the double collar & tie it.

Latex Double Base

Create a double collar for the base. Air inflate one cluster using 5" latex & the other using 11" latex. Slip the collar around the pole to cover the base.

#95229 - Celebrate Script

Air inflate the accent balloon. Tie it into the upper collar with curling ribbon. Adjust the height of the pole. Tie the other end of the accent balloon to the 5" cluster at the base of the tower.
