#11266 / #11267

Air inflate two latex balloons to 11" and tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Create a second cluster, inflating the balloons to 9". Tie a heavy weight to an uninflated 260, nest clusters together, wrap 260 around the clusters to hold them together and tie off.

#97068

Helium inflate the balloon. Roll the neck of the balloon around the middle of an uninflated 260 like a scroll. Tie the 260 to secure it to the balloon then use the loose ends to secure the foil balloon to the top of the latex clusters.

#97067

Helium inflate the balloon. Roll the neck of the balloon around the middle of an uninflated 260 like a scroll. Tie the 260 to secure it to the balloon then use the loose ends to tie the foil balloon to the hang tab on the top of 97068.

#7266

Create a 5" four balloon cluster using the method above. Slip the cluster under 97067 and twist it 90 degrees to secure it in place.

#18295 / #18296

Fully air inflate, then release all the air. Tightly wrap around a cylindrical object. Secure the tip of the balloon to the top of the cylinder using a clip. Fully air inflate, slip off the cylinder and tie. Secure the curls to the latex clusters using uninflated 260s.
