1	1537	Balloon Display Tower

#97598

Inflate the balloon. Slide the tail through one of the holes in the balloon cup & secure it with tape. Slip an uninflated twistee through the two remaining holes in the cup.

#1537

Assemble the display tower. Fill the base with water to provide stability. Extend the pole 4 feet.

#5221

Inflate two caribbean blue latex balloons to 5" & tie together to form a duplet. Repeat to create a 2nd duplet. Twist the duplets together to create a four-balloon cluster. Repeat to create a second identical cluster.

#11128

Repeat the steps above to create two clusters using 11" white latex balloons inflated to 9". Slip one white cluster onto the bottom of the pole. Nest a caribbean blue cluster on top.

#18203 / 18215 / 18221 / 18222

Inflate one of each color twistee to the same length. Leave 2" of each uninflated. Tie them together at the necks to create a + shape. Slide the twistees under the caribbean blue cluster at the base of the pole. Pull each twistee up between the balloons.

Braid the entire length of two twistees together. Twist the ends together to keep the braid from unraveling. Repeat this step for the remaining twistees. **Be sure to braid them in the same direction.**

Wrap the 1st braid around the pole. The twistees should naturally spiral upwards. Repeat this step with the 2nd braid wrapping it into the open space left from the 1st braid. Twist the ends of each braid together to secure them to the pole.

Cut the tips of the twistees, release the air from the twisted segments at the top & tie them together tightly to prevent deflation.

Slide the 2nd caribbean blue cluster on top of the braids. Use the loose ends of the braids to secure the cluster. Nest the remaining white cluster on top of the 5" cluster. Attach the cup & foil balloon on top of the pole. Slip the ends of the uninflated twistee through the 2 clusters & tie it to secure the foil balloon.
