1	1537	80" Balloon Display Tower

#97625

#11237

#97625

Air inflate. Slide the tail through one of the holes in the balloon cup from the display tower and secure it with clear tape. Slip an uninflated 160 Twistee through the two remaining holes in the cup. Set aside until the column is finished.

Balloon Clusters - #5259 #5126 / #11237

To create a balloon cluster, air inflate two latex balloons to equal size and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Use these steps to create 6 pink and 6 wild berry clusters inflated to 4". Create 2 of each spring lilac clusters inflated to 7", 8" and 9".

Building the Column - #1537

Assemble the balloon tower display and fill base with water. Work from the base up and add clusters as shown. Rotate each cluster 90° and nest them together tightly. Twist each cluster around the pole to secure it in place.

Top off the column with the foil balloon and use the uninflated 160 to tie it to the top two clusters of the column.
